BUILDERS & SEPTIC SERVICES, INC.

Let's Cut the Crap and Get to the Point

Septic Woes? Come to the Pros!

Jardine Builders takes care of all of your septic issues. All you really need to do is sign the documents that require your signature.

We do all of the following:

- Walk through your home and sketch the floor plan
- Inspect for plumbing and well issues
- Determine if a soil study is needed
- Interpret the soil study and give you options available for your septic system
- Initiate the paperwork process
- Lay out your site
- Purchase all necessary permits
- Subcontract to a licensed plumber or a licensed well driller
- We design the system
- We install the system
- We **rake and seed** the disturbed areas.
- We respond to any septic concerns a home owner may have in the future

Above: What we are is customer-oriented and all about aesthetics.

Below: What we're not is in business to devalue your property by unappealing cement boxes.

Which would you or a *potential* buyer rather see in the yard?

We are always Johnny-on-the-spot with new Technology!

- Members of our staff have attended several on-going educational classes at OSU. This keeps us current with new systems even better than the cement boxes.

- Some lots cannot be built on because existing systems will not handle the sewage treatment required. We are currently designing a system that can solve this issue.

- If a mound is your need we can have it designed and into the health department within 48 hours.

- We can design small flow systems because we have a staff professional engineer.

- We can install commercial and small flow systems.

- We are currently licensed in Trumbull, Mahoning, and Columbiana Counties.
